JOURNAL OF EDUCATIONAL MEASUREMENT
VOLUME 31, 1994

SUBJECT INDEX

Advanced Placement program: 37, 113
Angoff procedure: 339
Answer changing: 327
Attitude scales: 79

Bayesian estimation: 1

Classroom assessment: 359
Cognitive holding power: 161
Cognitive styles: 149
Computerized adaptive testing: 251
Confidence weighting: 149

Differential item functioning (DIF): 67, 88
Dimensionality: 17, 113, 125
DIMTEST: 17

Educational testing: 83
Equal percentile equating: 125
Equating: 125, 183
Examinee choice: 183

FACETS: 93
Free-Response items: 37, 113, 125, 275

Gender differences: 37, 149, 275
Group-Level IRT: 1
Growth: 51

Halo effect: 93

Information: 234, 295
Information function: 313
Item rating: 339
Item Response Theory (IRT): 1, 51, 88, 93, 125, 183, 200, 234, 264, 295

Local dependence: 113, 125

Mantel-Haenszel: 67, 88
Mental Measurements Yearbooks: 271
Multiple matrix sampling: 1
Multiple-Choice items: 37, 113, 149, 234, 295, 349

National Assessment of Educational Progress: 295
Nonlinear factor analysis: 17

Observed scores: 143

Parameter estimation: 200, 264
Partial credit model: 125, 295
Percentile rank: 313
Performance assessment: 125, 183, 220, 234, 275
Problem solving: 161
Program evaluation: 363

Rasch model: 93
Rater severity: 93
Rating errors: 93
Readability: 349
Reliability of differences: 143
Reliability: 143, 313

Scale development: 79
Scoring procedures: 220
Speededness: 200
Standard setting: 339

Test characteristics: 251
Test reviews: 271
True scores: 143

Unidimensionality: 17

Writing assessment: 93, 220
